Extensive product knowledge, genuine customer focus and over 30 years experience in the water industry are key reasons for the continuing success of Aquafresh Water Purifying Systems. Our company enjoys a first class reputation with customers and suppliers alike and has an enviable leadership role within the water filtration industry.

Throughout Brisbane, the Gold and Sunshine Coasts and in many parts of Queensland, wherever there's a need for the continued supply of clean, pure water for domestic, rural and industrial requirements you'll find no better water filtration specialists than the team at Aquafresh.

Our range of products is extensive and our centrally located, modern showroom features many fully-operational filtration units for side-by-side comparison. We are Master Distributors for ESP, Raindance, Freedom, Lab-Pure and MacClean products and are stockists of many other brands.

We specialise in total water treatment and have the qualifications, experience and resources to consult, advise, supply and commission major industrial and commercial installations anywhere in Australia. We are equally at home looking after domestic household water purification requirements and can advise on the most suitable filtration solutions for the needs and budget of home owners.

Over the page you'll recognise the names of many well known Australian companies and organisations. All are customers of Aquafresh. Join them, you'll be in good company.

For more information contact Aquafresh Water Purifying Systems or your Aquafresh authorised representative.
